

ipv Delft highlights

The visual newsletter that puts ipv Delft in the spotlight.

boardwalk Laan van Buijsen, Pijnacker (NL)

Meandering timber **boardwalk** for new housing development. Located in the neighbourhood park, set on top of a retaining wall.

Maarhuizen footbridge, Het Hogeland (NL)

Elegant steel **footbridge** in rural area. Design inspired by local traditional

timber footbridges with high clearance and steps on either side.

't Heem road bridge, Joure (NL)

Engineering and design optimisation for basic **sustainable bridge**. Second hand castellated steel beams and used steel pile foundations.

Michiel de Ruyter Bridge, Urk (NL)

Landmark **movable bridge** for new housing development. Expected to be completed later this year. Showcases our expertise in movable bridges.
